

Bulk Loading Chutes

Suitable for handling dry products in powder or granular form.

Filling open back vehicles

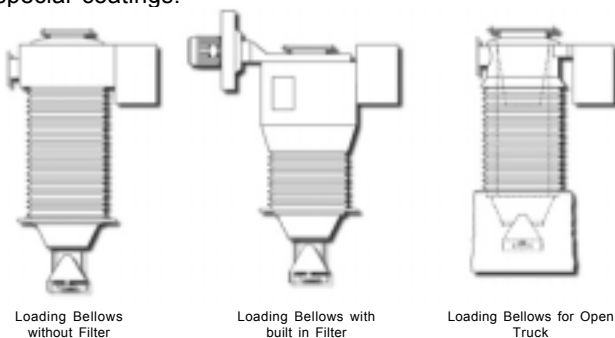

Filling Bulk Tanker through standard hatch

Different models for loading of open trucks and tankers are available.

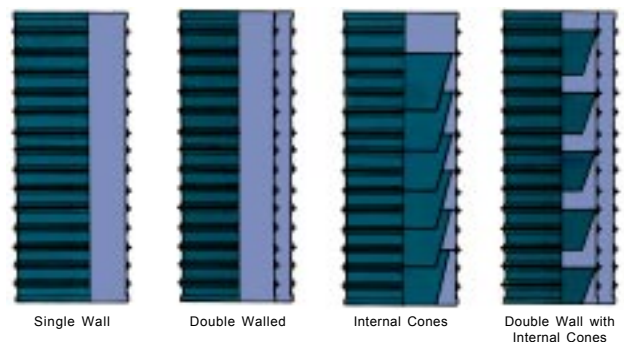

There are two main categories of loading chutes for open loading and for closed loading (with the possibility of combining the two types) Each type can be supplied with the following accessories:

- ♦ Dust extractor connection on the upper head for dust-generating materials.
- ♦ Double-walled bellows for light and dusty materials, for improved dust extraction without interfering with the flow of the material.
- ♦ Metal inner cones for use with granular and abrasive products such as sand, granular feed products minerals, coal and stone chippings.
- ♦ Electrical-mechanical operation with pendant control or hand winch.
- ♦ Maximum and minimum safety level switch.
- ♦ Automatic raising when filling open back vehicles.
- ♦ Slack cable contact.
- ♦ A range of different types of level detector (all of which are fitted in a safety cone).
- ♦ Built-in dust extraction which sends the extracted dust back down to the material being loaded; this system, which avoids leakages and clogging-up ducts. Complete with extraction fan and reverse jet filter.
- ♦ Electrical control panel fully wired to the chute ready for operation.

The Bulk Loading Chutes are widely used in all industries; the available versions are made from mild steel or stainless steel with special coatings.

Loading Chute Types

Bellow Types

Bellows are manufactured from Hypalon-Neoprene with mild steel or stainless steel internal cones
